Balakrishna, S., Experimental study of fracture mechanisms in sandstones 119
Balakrishna, S., Estimation of the rigidity of the Earth by Earth tide studies 225
Beloussov, V. V., Some comments on possible processes in the Earth's mantle 371
Berg, C. A., A note on the mechanics of seismic faulting 89
Blum, P. A., J. Corpel, G. Jobert, J. Nières & A. Rouaud, Détermination des propriétés élastiques ou anélastiques du manteau à l'aide des charges dues aux marées océaniques 219

Book Reviews:
——, Atomic spectra 541
——, Magnetism and the cosmos 541
——, The craters of the Moon: an observational approach 542
Bott, M. H. P., Terrestrial heat flow and the mantle convection hypothesis 413
Braslau, David & Paul Lieber, Relaxation phenomena and the origin of earthquakes .. 439
Chamalaun, F. H. & H. Porath, Palaeomagnetism of Australian hematite ore bodies—I. The Middleback Ranges of South Australia 451

Continental structure:
——, Oceanic tidal loads and regional heterogeneity in Western Europe, P. Melchior .. 239
Corpel, J., P. A. Blum, G. Jobert, J. Nières & A. Rouaud, Détermination des propriétés élastiques ou anélastiques du manteau à l'aide des charges dues aux marées océaniques 219
Crittenden, Max D. Jr, Viscosity and finite strength of the mantle as determined from water and ice loads 261

Earth—free oscillations of:
——, Spherical oscillations of the Earth, Louis B. Slichter 171
——, Torsional oscillations of the anelastic Earth, V. N. Zharkov, V. M. Lubimov, A. A. Movchan & A. I. Movchan 179

Earth—gravity field:
——, A satellite determination of tidal parameters and Earth decelaration, R. R. Newton 505

Earth—physics of the interior:
——, Inelastic processes in the shell, Sir Harold Jeffreys 1
——, Thermally activated processes in the Earth: creep and seismic attenuation, Robert B. Gordon 33
——, Plastic deformation of upper mantle silicate minerals, C. B. Raleigh 45
——, An experimental study of the effect of temperature and stress on the creep of rocks, with a discussion of Earth tide damping, isostasy and mantle convection, S. A. F. Murrell 51
——, Preferred mineral orientation by recrystallization under non-hydrostatic stress and geotectonic stress in the upper mantle, M. Kumazawa & Y. Shimazu .. 57
——, On the influence of the rheological properties of a medium upon some regularities of its seismic regime, K. I. Kuznetsova 61
——, Dislocation velocities and deformation in the mantle, J. Rimas Vaišnys 67
——, An experimental investigation of rupture and elastic wave propagation and absorption in rocks under high confining pressure, M. P. Volarovich 73
——, The effects of triaxial stress systems on the fracture of rocks, and on the nature of faulting and earthquakes, S. A. F. Murrell 81
